DETAILED ACTION

Examiner's Amendment

The specifications (page 2, line 13) contain the phrase 'rotary witch'. The examiner is assuming that is a typographic error and has changed it to 'rotary switch.'

Allowable Subject Matter

Claims 1 and 2 are allowed. The following is an examiner's statement of reasons for allowance: The prior art fails to show or teach a desk lamp structured to comprise two lamps separately configured on extremities of the two support stands which are mounted onto the following: a fixing plate placed on top of the gears; screws utilized to screw down the fixing plate onto fixing posts; and a rotary switch within the base as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Waltman (US Patent 1,996,713) teaches a lamp configured on an extremity of a support stand, a fixing plate with screws, and a rotary switch. Belcher (US Patent 2,136,369) teaches three lamps separately configured on extremities of three support stands, which are mounted onto a rotatable sleeve connected to a base. Kurtz (US Patent 4,685,759) teaches a lamp mounted on a rotary sleeve connected to gears within the base.
